Does Flight Distance Affect Arrival Delays?

Airline Performance

Operational Inefficient Flights

Count of Flight_ID	Airline	Sum of Departure_Delay_min	Average of Arrival_Delay_min
1521	Emirates	137234	160.73
1397	Lufthansa	124052	160.26
1504	Delta	136573	160.06
1460	Indigo	130777	159.64
5882		528636	160.18

Flights Demonstrating Delay Recovery

Count of Flight_ID	Airline	Sum of Departure_Delay_min	Average of Arrival_Delay_min
1697	Delta	201126	
1714	Emirates	204657	
1633	Indigo	196208	
1672	Lufthansa	199586	
6716		801577	

KEY INSIGHTS

- Emirates recorded the highest number of delayed flights(1,968), indicating greater punctuality challenges.
- Lufthansa recorded the lowest average arrival delay(97.90 mins) and demonstrated the strongest performance.
- Short haul flights experienced the highest average arrival delays.
- Some flights recovered significant delay during transit, showing effective in-flight management.
- Several flights experienced severe delays(>120 mins) and are classified as operationally inefficient.
